MECHANISMS OF AGEING AND DEVELOPMENT

SUBJECT INDEX

Volume 64 (1992)

Actin, energy restriction, prolactin, pituitary volume, insulin, 21
Active E rosette test, T lymphocytes, ageing, inositol lipids, 61
Adherence, neutrophil, membrane viscosity, superoxide anion generation, 293
Ageing, catalase, conjugated-diene formation, glutathione peroxidase, oxygen absorption, lipid peroxidation, superoxide dismutase, TBA value, vitamin E, 273
Ageing, cerebral microvasculature, ultrastructure, dihydropyridine, nimodipine, 255
Ageing, nucleotides, lymphocytes, granulocytes, HPLC, 1
Ageing, T lymphocytes, active E rosette test, inositol lipids, 61
Aging, amyotrophic lateral sclerosis, motoneurone disease, mortality, epidemiology, 201
Aging, aortic nerve stimulation, baroreflex impairment, catecholaminergic lesions, nucleus tractus solitarius, 6-hydroxydopamine, 69
Aging, bone marrow, thymic stroma, membrane polypeptides, 99
Aging, emphysema, mortality, epidemiology, 161
Aging, follicle-stimulating hormone, follicle number, progesterone-induced acyclicity, 111
Aging, glutathione, free radicals, heart, histofluorescence, rat, 37
Aging, lymphocytes, proliferative response, merocyanine 540, c-*myc*, c-*myb*, 177
Aging, lysosomal bodies, protein synthesis, dietary restriction, 49
Aging, mtDNA content, biotinylated mtDNA probe, regenerated liver, 85
Aging, protein synthesis, yeast, cell size, polysome, 235
Aging, rats, lipoproteins, ethyl estradiol, plasma LCAT, cholesterol, 123
Alu, 7SL RNA, Alzheimer's disease, 13
Alzheimer's disease, 7SL RNA, Alu, 13
Amyotrophic lateral sclerosis, motoneurone disease, mortality, aging, epidemiology, 201
Anticodon loss theory, human mortality, genetic triplet code, 149
Aortic nerve stimulation, aging, baroreflex impairment, catecholaminergic lesions, nucleus tractus solitarius, 6-hydroxydopamine, 69

Baroreflex impairment, aging, aortic nerve stimulation, catecholaminergic lesions, nucleus tractus solitarius, 6-hydroxydopamine, 69
Biotinylated mtDNA probe, mtDNA content, aging, regenerated liver, 85
Blood-brain barrier, in vivo microscopy, FITC-dextran, vascular reactivity, 247
Bone marrow, aging, thymic stroma, membrane polypeptides, 99
Brain fluorophores, neuronal aeroid lipofuscinosis, chromatography, spectrofluormetry, 303

C-*myb*, aging, lymphocytes, proliferative response, merocyanine 540, c-*myc*, 177
C-*myc*, aging, lymphocytes, proliferative response, merocyanine 540, c-*myb*, 177
Catalase, ageing, conjugated-diene formation, glutathione peroxidase, oxygen absorption, lipid peroxidation, superoxide dismutase, TBA value, vitamin E, 273
Cataract, spin label, lens, fiber cell plasma membranes, 133
Catecholaminergic lesions, aging, aortic nerve stimulation, baroreflex impairment, nucleus tractus solitarius, 6-hydroxydopamine, 69
Cell size, protein synthesis, yeast, aging, polysome, 235
Cerebral microvasculature, ageing, ultrastructure, dihydropyridine, nimodipine, 255
Cholesterol, aging, rats, lipoproteins, ethyl estradiol, plasma LCAT, 123
Chromatography, neuronal aeroid lipofuscinosis, brain fluorophores, spectrofluormetry, 303

Conjugated-diene formation, ageing, catalase, glutathione peroxidase, oxygen absorption, lipid peroxidation, superoxide dismutase, TBA value, vitamin E, 273
Cytochromes *P*-450, drug metabolism in aging, erythromycin N-demethylation, 189

Dietary restriction, lysosomal bodies, protein synthesis, aging, 49
Dihydropyridine, ageing, cerebral microvasculature, ultrastructure, nimodipine, 255
Drug metabolism in aging, cytochromes *P*-450, erythromycin N-demethylation, 189

Emphysema, mortality, aging, epidemiology, 161
Energy restriction, prolactin, pituitary volume, actin, insulin, 21
Epidemiology, amyotrophic lateral sclerosis, motoneurone disease, mortality, aging, 201
Epidemiology, emphysema, mortality, aging, 161
Erythromycin N-demethylation, cytochromes *P*-450, drug metabolism in aging, 189
Ethyl estradiol, aging, rats, lipoproteins, plasma LCAT, cholesterol, 123

Fiber cell plasma membranes, spin label, lens, cataract, 133
FITC-dextran, in vivo microscopy, blood-brain barrier, vascular reactivity, 247
Follicle number, follicle-stimulating hormone, aging, progesterone-induced acyclicity, 111
Follicle-stimulating hormone, follicle number, aging, progesterone-induced acyclicity, 111
Free radicals, glutathione, heart, histofluorescence, aging, rat, 37

Genetic triplet code, human mortality, anticodon loss theory, 149
Glutathione, free radicals, heart, histofluorescence, aging, rat, 37
Glutathione peroxidase, ageing, catalase, conjugated-diene formation, oxygen absorption, lipid peroxidation, superoxide dismutase, TBA value, vitamin E, 273
Granulocytes, ageing, nucleotides, lymphocytes, HPLC, 1 Heart, glutathione, free radicals, histofluorescence, aging, rat, 37

Histofluorescence, glutathione, free radicals, heart, aging, rat, 37
HPLC, ageing, nucleotides, lymphocytes, granulocytes, 1 Human, type III collagen, type IV collagen, type VI collagen, laminin, synovial membrane, immunocytochemistry, 219
Human mortality, genetic triplet code, anticodon loss theory, 149
6-Hydroxydopamine, aging, aortic nerve stimulation, baroreflex impairment, catecholaminergic lesions, nucleus tractus solitarius, 69

Immunocytochemistry, type III collagen, type IV collagen, type VI collagen, laminin, synovial membrane, human, 219
In vivo microscopy, FITC-dextran, blood-brain barrier, vascular reactivity, 247
Inositol lipids, T lymphocytes, ageing, active E rosette test, 61
Insulin, energy restriction, prolactin, pituitary volume, actin, 21

Laminin, type III collagen, type IV collagen, type VI collagen, synovial membrane, human, immunocytochemistry, 219
Lens, spin label, fiber cell plasma membranes, cataract, 133
Lipid peroxidation, ageing, catalase, conjugated-diene formation, glutathione peroxidase, oxygen absorption, superoxide dismutase, TBA value, vitamin E, 273
Lipoproteins, aging, rats, ethyl estradiol, plasma LCAT, cholesterol, 123
Lymphocytes, ageing, nucleotides, granulocytes, HPLC, 1
Lymphocytes, aging, proliferative response, merocyanine 540, c-*myc*, c-*myb*, 177
Lysosomal bodies, protein synthesis, aging, dietary restriction, 49

Membrane polypeptides, aging, bone marrow, thymic stroma, 99
Membrane viscosity, neutrophil, adherence, superoxide anion generation, 293
Merocyanine 540, aging, lymphocytes, proliferative response, c-*myc*, c-*myb*, 177
Mortality, amyotrophic lateral sclerosis, motoneurone disease, aging, epidemiology, 201
Mortality, emphysema, aging, epidemiology, 161
Motoneurone disease, amyotrophic lateral sclerosis, mortality, aging, epidemiology, 201
mtDNA content, biotinylated mtDNA probe, aging, regenerated liver, 85

Neuronal aeroid lipofuscinosis, brain fluorophores, chromatography, spectrofluormetry, 303
Neutrophil, adherence, membrane viscosity, superoxide anion generation, 293

Nimodipine, ageing, cerebral microvasculature, ultrastructure, dihydropyridine, 255
Nucleotides, ageing, lymphocytes, granulocytes, HPLC, 1
Nucleus tractus solitarius, aging, aortic nerve stimulation, baroreflex impairment, catecholaminergic lesions, 6-hydroxydopamine, 69

Oxygen absorption, ageing, catalase, conjugated-diene formation, glutathione peroxidase, lipid peroxidation, superoxide dismutase, TBA value, vitamin E, 273

Pituitary volume, energy restriction, prolactin, actin, insulin, 21
Plasma LCAT, aging, rats, lipoproteins, ethyl estradiol, cholesterol, 123
Polysome, protein synthesis, yeast, aging, cell size, 235
Progesterone-induced acyclicity, follicle-stimulating hormone, follicle number, aging, 111
Prolactin, energy restriction, pituitary volume, actin, insulin, 21
Proliferative response, aging, lymphocytes, merocyanine 540, c-*myc*, c-*myb*, 177 Protein synthesis, lysosomal bodies, aging, dietary restriction, 49
Protein synthesis, yeast, aging, cell size, polysome, 235

Rat, glutathione, free radicals, heart, histofluorescence, aging, 37
Rats, aging, lipoproteins, ethyl estradiol, plasma LCAT, cholesterol, 123
Regenerated liver, mtDNA content, biotinylated mtDNA probe, aging, 85 7SL RNA, Alu, Alzheimer's disease, 13

Spectrofluormetry, neuronal aeroid lipofuscinosis, brain fluorophores, chromatography, 303
Spin label, lens, fiber cell plasma membranes, cataract, 133
Superoxide anion generation, neutrophil, adherence, membrane viscosity, 293
Superoxide dismutase, ageing, catalase, conjugated-diene formation, glutathione peroxidase, oxygen absorption, lipid peroxidation, TBA value, vitamin E, 273
Synovial membrane, type III collagen, type IV collagen, type VI collagen, laminin, human, immunocytochemistry, 219

T lymphocytes, ageing, active E rosette test, inositol lipids, 61
TBA value, ageing, catalase, conjugated-diene formation, glutathione peroxidase, oxygen absorption, lipid peroxidation, superoxide dismutase, vitamin E, 273
Thymic stroma, aging, bone marrow, membrane polypeptides, 99
Type III collagen, type IV collagen, type VI collagen, laminin, synovial membrane, human, immunocytochemistry, 219
Type IV collagen, type III collagen, type VI collagen, laminin, synovial membrane, human, immunocytochemistry, 219
Type VI collagen, type III collagen, type IV collagen, laminin, synovial membrane, human, immunocytochemistry, 219

Ultrastructure, ageing, cerebral microvasculature, dihydropyridine, nimodipine, 255

Vascular reactivity, in vivo microscopy, FITC-dextran, blood-brain barrier, 247
Vitamin E, ageing, catalase, conjugated-diene formation, glutathione peroxidase, oxygen absorption, lipid peroxidation, superoxide dismutase, TBA value, 273 Yeast, protein synthesis, aging, cell size, polysome, 235
